Professional Summary

Computer Science Engineering student passionate about Full Stack Development, Artificial Intelligence applications, and UI/UX design. Interested in creating engaging and user-friendly interfaces, designing prototypes, and developing scalable solutions that solve real-world problems.

Technical Skills

Languages: Java, C, Python, JavaScript, TypeScript

Frontend / Backend: HTML, CSS, Bootstrap, Tailwind CSS, React, Node.js, Express.js, Spring Boot

Databases: MySQL, PostgreSQL

AI / ML: PyTorch, Hugging Face, YOLOv8

Tools & Platforms: Git, GitHub, Postman, VS Code, Docker, XAMPP, Google Colab, LaTeX, Figma, Canva

Core CS Concepts: Object-Oriented Programming, Data Structures, DBMS

Projects

JCET Hub – Smart Campus Management Platform

Tech Stack: Node.js, Express.js, PostgreSQL, WebSockets

- Developed a smart campus platform with QR-based attendance, event management, and role-based dashboards for students, faculty, and administrators.
- Built scalable backend architecture with real-time notifications using WebSockets.

NeuroVisionAI – Real-Time Object Detection System

Tech Stack: Python, PyTorch, YOLOv8

- Developed a real-time object detection system using YOLOv8 and PyTorch, trained on the COCO dataset using GPU resources on Google Colab.
- Enabled recognition of multiple object classes with efficient inference.

NextStop JGI – Real-Time Bus Tracking Platform

Tech Stack: React, TypeScript, Node.js, WebSockets

- Developed a real-time bus tracking system with live location updates and role-based dashboards for students, drivers, and administrators.
- Improved transportation efficiency through continuous tracking.

CodeInsight – Repository-Aware AI Code Review Platform

Tech Stack: AI Integration, JavaScript

- Built an AI-powered code review system analyzing repository architecture and dependencies, with an AutoFix engine for patch validation and rollback.
- Implemented multimodal debugging support using text, voice, screenshots, and logs.

ResolveAI – AI Customer Complaint Resolution Agent

Tech Stack: FastAPI, Next.js, PostgreSQL, Hugging Face

- Built an AI-powered complaint resolution platform using NLP models for sentiment analysis and complaint classification.
- Designed confidence-based escalation mechanisms and analytics dashboards.

Experience

Web Developer Intern — StudyEcart Technologies Pvt Ltd

Remote | Tech Stack: Java, Spring Boot, React, JavaScript, Node.js, Bootstrap, MySQL, Postman, Git, VS Code, XAMPP

- Working in a live industry internship environment with daily standups and collaborative development workflows.
- Developing and maintaining web applications using Java, Spring Boot, React, JavaScript, Node.js, and Bootstrap.
- Testing APIs and backend services using Postman and integrating data with MySQL databases.
- Utilizing Git, VS Code, and XAMPP for development and version control.

Certifications & Achievements

Certifications: NPTEL, IBM SkillsBuild, LinkedIn Learning, Anthropic Claude, Forage Virtual Experience Programs

- HackArena 2026 – Jain College of Engineering and Technology: Selected among finalist teams.
- HackO'Clock 2026 – KLE Institute of Technology: Top 8 Finalist Team.
- HackFusion – AGM College, Varur: Participated in collaborative hackathon focused on innovative problem solving.
- AI Prompt Battle: Reached the final round.

Education

Jain College of Engineering and Technology (VTU)

2023 – 2027

Bachelor of Engineering in Computer Science and Engineering | CGPA: 8.38 / 10

KLE Prerana Residential College

2021 – 2023

Higher Secondary Education (PUC) | Percentage: 91.7%
